

Pharo: a powerful tool for researchers

S. Ducasse

<http://www.pharo.org>

IT'S SAD HOW SOME PEOPLE
CAN'T HANDLE A LITTLE
VARIETY.

WEEBON

To support research...

- Fast experimentation
- Simple but representative and realistic
- Be meta: Building tools to understand results

Simple yet powerful language

- Syntax on a post card
- Uniform model
- Elegant
- Powerful (context,...stack manipulation)

“Less is better”

- No constructors
- No types declaration
- No interfaces
- No packages/private/protected modifier
- No parametrized types
- No boxing/unboxing

Available “Language” libraries

- Open compiler (full text to IR to BC)
- MOP
- Code models (Ring, FAMIX)
- Fully bootstrap kernel

Code Manipulation

- Clean AST with 12 nodes
- PetitParser (Modular/Composable parser)
- OMeta
- Rewrite engine (parse tree unification)
- Refactorings
- Domain specific rules

Execution Engines...

- ASM JIT available and modifiable on the fly
- Two virtual machines
- Full AST interpreter

Moose: a MetaTool

- www.moosetechnology.org
- A platform for data and software analyses
- Crafting analyses easy

Search moosetechnology.org

Moose is a platform for software and data analysis.

It is an open source project since 1996. It is supported by several research groups around the world, and it is increasingly adopted in industrial projects.

crafting analyses
made easy

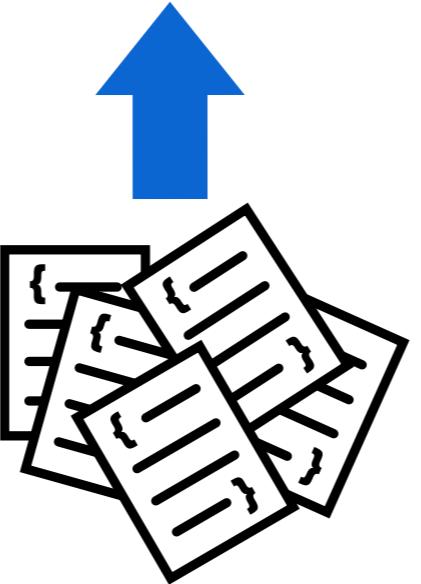

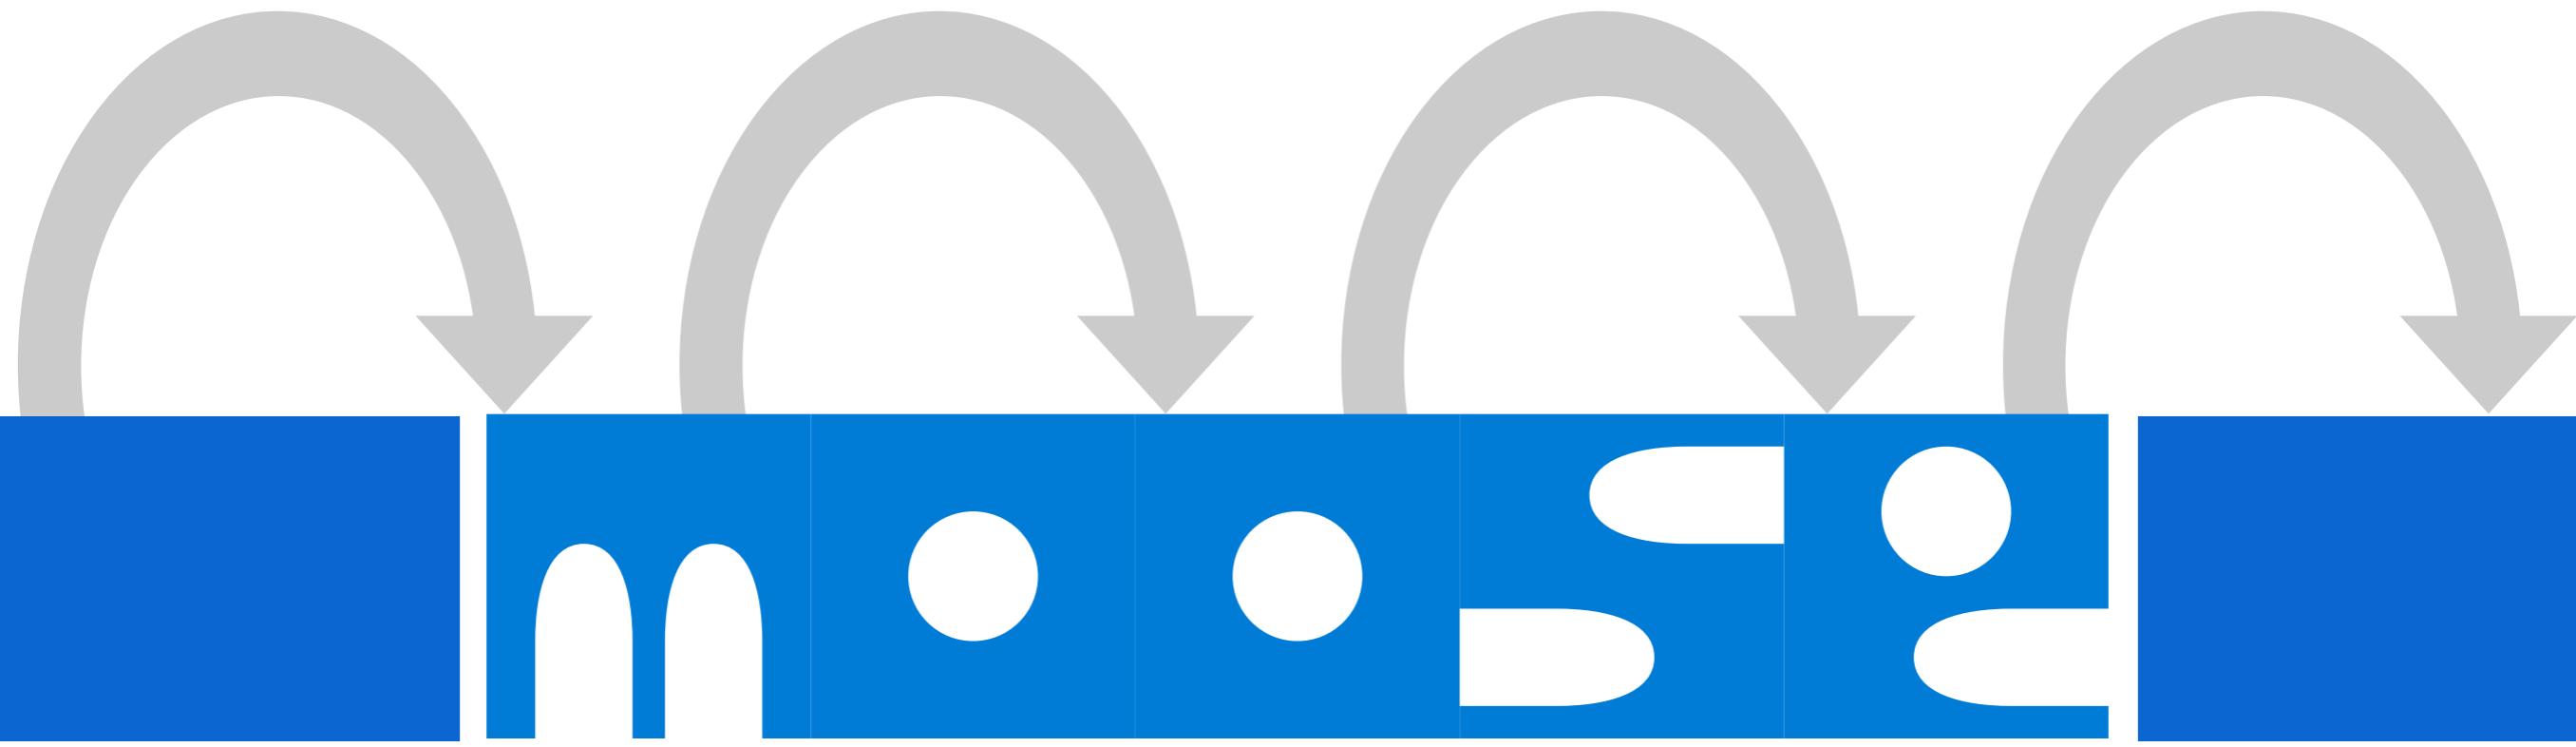

classes select: #isGod

McCabe = 21

LOC = 753,000

Moose key engines

- Roassal (scripting visualisation engine)
- Eyesee (charts)
- Glamour (tool and flow builder)
- PetitParser
- Magritte (MetaModelling frameworks)

Language design ...

- Towards first class references for security J-B Arnaud - RMoD
- Application-level memory pager M. Martinez-Peck
Ecole des Mines de Douai.
- Isolating spaces (proxy, mirrors...) C. Teruel - RMoD
- Contextual changes E Wernli. - University of Bern
- Gradual typing - O. Callau - University of Santiago

DSL with Helvetia

- Lukas Renggli - Software composition group - Bern
- Debugger
- Composition/Nesting

On Tools

- Object-centric Debugger - J. Ressia - Software composition group - Bern
- Orion - Offering multiple future to analyses - J. Laval RMoD.
- Smart IDEs - R. Minelli - University of Lugano

Software Engineering

- Supporting merge in stream of changes - V. Uquillas-Gomez - VUB Belgium
- Automatic rule generation based on commit history - A. Hora - RMOD
- Test Coverage and Profiler. JP Sandoval - University of Santiago

On our artefacts

- “How (and Why) Developers Use the Dynamic Features of Programming Languages: The Case of Smalltalk”
O. Calláu, R. Robbes, É. Tanter, D. Röthlisberger – EMSE, in press Empirical Software Engineering (Springer)
- Extensions during Software Evolution: Do Objects Meet Their Promise?
R. Robbes, D. Röthlisberger, É. Tanter – ECOOP 2012, 26th European Conference on Object-Oriented Programming

We value research

- Can assess qualitatively results, participate to experiences, surveys
- Integrate artefacts when they are mature
- The community is really supportive

Our Motto

- Some parts are not as nice as they should be, but
- we are improving the system systematically
- Remember: Our goal is to invent the future :)
