Roadmap

- ★ Natural Flow
- ★ Reusable Components
- ★ Secure by Default
- ★ Web 2.0
- ★ Applications

In production since
2002

Welcome to Seaside-Hosting

Welcome to Seaside-Hosting, a free hosting service for [Seaside](#) applications sponsored by [netstyle.ch](#) and [esusq](#).

[Home](#)

[Register](#)

[Support](#)

What is Seaside-Hosting?

Seaside-Hosting is a free hosting service for non-commercial Seaside applications. In contrast to a standard hosting or a virtual server hosting this service provides a simple way to interface to set up and run your Seaside applications. It allows you to put your own Seaside application online within minutes.

Seaside-Hosting offers 12.8 MB of storage space for saving the Squawk web-application image and static files, e.g. pictures or style sheets which you want to use as part of your application.

What isn't Seaside-Hosting?

Do not expect for an account if you want to serve files. If you need full access to the server, need a database, or if you have a commercial application. Seaside-Hosting does not offer you to run PHP, ASP, Perl etc. If you need such a hosting or additional services please contact seasidehosting@seasidehosting.ch.

Show me cool examples!

Home

Welcome to SqueakSource, the smart Monticello code-repository for Squeak. To get started register your personal account and create any number of projects to host on our server. You'll immediately get all the necessary permissions to create and manage your account, projects and versions. Detailed instructions can be found in the [Getting Started](#).

This service is brought to you free. It is backed up daily. Still, please make sure that you have your own proper backups and note that we cannot give any accessibility guarantees. However, if you wish you can set up your own SqueakSource server. It is self-hosted and can be downloaded from [SqueakMap](#).

Please report any problems or suggestions to the [Squeak Mailing List](#). Enjoy!

We gratefully acknowledge the support of the Software Composition Group and the University of Bern for hosting this service.

Welcome to the Run BASIC site!

This free site you can run and write your own custom computer programs in the familiar BASIC language without installing any programming software or your computer! Run BASIC is based on our popular [Liberty BASIC](#) programming language, a mainstay in BASIC programming since 1992.

Get started by running one of the many examples by clicking on the tabs ([HILOS.bas](#), [SINEWAVE.bas](#), etc.). Look at the code and run the programs. Tweak the code and run it again. Go nuts! :-)

Write your own programs. Share them! Choose the [Write Your Own tab](#) and write your own programs. Once you've got it working, share your creation with others by clicking the [Share with a friend link](#). It's that easy!

STECKBRIEF 

Namen: Peter Hansmann
Geburtsdatum: 1985-01-01
Wohnort: München
Beruf: Bergsteiger
In der Freizeit: Wandern
Letzter Besuch: 15.07.2017

Über mich
Ein Leben ohne Sport und ohne Outdoor-Aktivitäten ist mir nicht mehr vorstellbar. Ich habe mich in den letzten 15 Jahren engagiert für verschiedene Bergvereine und war dabei bei vielen Meilensteinen und großen Erfolgen. Meine Lieblingsberge sind der Nanga Parbat und die Karakorum. Ich mag es, wenn ich oben auf dem Gipfel bin, weil dann Panorama - super Sache. Ich kann auch Bergsteigen - super Sachen.

The screenshot shows the CMSbox software interface. At the top, there's a navigation bar with 'CMS' and various icons. Below it is a toolbar with 'PRODUKT', 'SERVICES', and 'FIRMA'. The main area features a blue header with the CMSbox logo and a background image of a tree. A horizontal menu bar below the header includes 'KONTAKT', 'TEAM', 'FAKTTEN', 'ENGAGEMENT', 'PARTNER', and 'GOODIES'. The central content area contains the text 'Elemente ausschneiden, kopieren und einfügen' and a sub-section 'Hier sind Sie richtig'. A WYSIWYG editor is shown with a tree image, and a context menu is open over some text, displaying options like 'Durchsuchen', 'Doppelzitieren', and 'Löschen'.

The screenshot shows the 'Edit Workflow' dialog box with the 'Activities' tab selected. The 'Activities' tab has several sub-options: General, Graph, Diagram, Activities, and Versions. Below the tabs, there's a 'Label' column and a 'Default' column. Under 'Label', there are entries like 'Text Field', 'Memo Field', 'Number Field', 'Money Field', 'Age', 'Check-Box', 'Option-Box', 'Date Field', 'Time Field', 'Timestamp Field', 'Duration Field', 'Simple Document', 'Managed Document', 'Nested', and 'Table'. To the right of each label, there's a 'Type' column and three small buttons: [remove], [up], and [down]. A large 'Add' button is located at the bottom left of the list, and a 'Preview' button is located at the bottom center.

Aspen, Colorado
World class Aspen has it all. Nightlife, dining, arts, entertainment, and shopping. Long considered a winter playground with its quadruple peaks, Aspen is the ideal place for winter sports. Additionally, summer activities include luxury homes, condominiums, mountain resorts and hotels.

Phoenix, Arizona
Get out and get active in the Valley of the Sun. Phoenix boasts being the largest city in the nation, has a rejuvenated downtown core and is becoming a mecca for professional sports. Enjoy the desert sun, great weather and activities with an average of over 300 days of sunshine each year.

Cmsbox – Das Content Management mit System

CMS Demo Movie

Funktioniert einfach.

Die cmsbox ist ein Web-Baukasten der nächsten Generation. Die Benutzeroberfläche ist nahtlos in die Webseite integriert: Alle Elemente, wie Texte, Links oder Bilder werden direkt auf der eigenen Internetseite bearbeitet und können bequem per Drag & Drop positioniert werden.

Einfach professionell.

Die cmsbox sorgt dafür, dass die Webseite immer perfekt aussieht: Mit zentral definierten Formatvorlagen und einem flexiblen Spaltenlayout passen sich alle Inhalte automatisch an das individuelle Design der Webseite an.

FEATURES

29 Nimble, Fast and Small

BizTech profiles three software startups, which offer insights on how to launch companies with staying power.

34 Pay-Per Chase

Search engine advertising needn't be a gamble — plus, with good analytics, you can rack up solid metrics about how well a campaign meets its goals.

43 Spin Control

Have a great in-house tech tool that you want to sell commercially? Find out how other companies succeeded in taking their wares to market.

Dare to take your own approach to creating and managing your company, say Andrew Catton (left) and Avi Bryant, co-CEOs of Smallthought Systems. Page 29

CONTENTS

39 Warming Up to Solar Energy

In Silicon Valley, startup Miasolé relies on technology as it works on a breakthrough approach to producing solar energy panels so thin they can be embedded in roofing and other materials, says IT chief Stephen Barry.

This screenshot captures a complex financial software interface, likely Quuve, displaying multiple windows and charts related to portfolio management and research.

The top navigation bar includes tabs for Grab, File, Edit, Capture, Window, Help, Advisory, Clients, Portfolios, Research, and Securities. A timestamp at the top right shows "Wed 6:15 PM Cameron Sanders".

The main interface features several windows:

- Chart for MSFT:** A line chart showing Microsoft's stock price from 2008 to 2015, comparing actual performance (red line) against various models and indices (blue, green, yellow lines).
- Portfolio Browser:** A grid view of portfolios, with one entry for Amazon.com (AMZN) shown in detail.
- Controls:** A summary table for the date 03/25/2015, showing Quuve Cash & Equities, Quuve Total Value, Custodian Cash & Equities, and Custodian Total Value.
- Base Valuations:** A detailed table of financial metrics for various companies across years 2008-2014.
- PROFITABILITY:** A table showing gross margin percentages for different companies.
- Common (Basic) Yields:** A table of yield percentages for various securities.
- PER SHARE MEASURES:** A table of per-share financial metrics.
- LEVERAGE:** A table of leverage ratios.
- Debris Publishing Web Interface:** A separate window showing pie charts of portfolio allocations and client details.
- Clients Overview:** A table of clients with columns for Client Name, Advisor, Is Employee, Account Owners, and Benchmark Portfolio.

The right side of the interface includes a large "QUUVE." logo, a welcome message, and a note that Quuve is a product of Debris Publishing Inc. with a copyright notice from 2007-2015.

The world's first online platform fully supporting risk-based test management.

- Your IT is critical to your company.
- Would you dare not to control your risks and neglect the possible impact for your company and customers?
- Start controlling your risks in a standardized and easy way !!!

▶ FREE TRIAL

1 BETTER

NORIZZK.COM guides you in composing the most effective and efficient end-to-end test strategy, starting from identified product risks. It helps you focus on the critical aspects of your projects and products.

NORIZZK.COM is the only platform for risk based test management showing you a comprehensive and visual overview on the risk status of your project.

▶ YOUR ADDED VALUE

2 FASTER

NORIZZK.COM is the fastest way to compose your master and detailed test plan. It comes with a predefined knowledge base containing best practices for building your test plan, thus giving you a head start.

NORIZZK.COM allows sharing and reusing knowledge and experiences from previous projects. Over time, **NORIZZK.COM** becomes smarter in guiding you since it is self-learning and continuously improves its best practices.

▶ YOUR ADDED VALUE

3 CHEAPER

As from now, wasting time and money by re-inventing the wheel is history. **NORIZZK.COM** gives you significant savings in creating your test plans.

It provides an intelligent and complete approach for all test managers. **NORIZZK.COM** contains sustainable testing intelligence that can easily be maintained.

▶ YOUR ADDED VALUE

COMPONENTS

Risk Assessment

Identify, categorize, prioritize and mitigate your risks with one single tool.

Test strategy

Write your master and detailed test plan in a faster way.

Test Results

Capture all the test results to monitor the progress.

Reporting

Monitor the progress using the Risk

Export

Export your test plan to a docx file.

Business Intelligence

Discover intelligence in your testing

The background features abstract, dark gray geometric shapes. A large, dark gray parallelogram is positioned in the upper-left quadrant, with its top-right corner cut off by a diagonal line. Below it, a smaller, dark gray rectangle is partially visible. To the right of the parallelogram, there are two dark gray squares: one at the bottom center and another at the bottom right.

Welcome

Seaside provides a complete integration of [jQuery](#), allowing the use of the library without having to write a single line of JavaScript code. Everything can be configured and plugged together using Smalltalk objects. Try by yourself, by clicking through this functional test suite and by browsing the source-code.

Seaside

Seaside is a framework for developing sophisticated web applications in Smalltalk. It provides a layered set of abstractions over HTTP and HTML that let you build highly interactive web applications quickly, reusably and maintainably.

jQuery

jQuery is a fast and concise Javascript Library that simplifies HTML document traversing, event handling, animating, and Ajax interactions for rapid web development. jQuery is designed to change the way that you write JavaScript.

Reef

- ★ AJAX/Javascript component framework for Seaside
- ★ Encapsulates Javascript in seaside components for you
- ★ Let you control client vs. server side requests

Example

The image shows a digital interface for a 'todos' application. At the top, the word 'todos' is displayed in a large, semi-transparent gray font. Below this, a dark brown header bar contains the question 'What needs to be done?' in a light gray, italicized font. The main content area is a white box containing three items, each preceded by a checked gray checkbox and followed by a vertical red line. The items are: 'finish this presentation', 'abc', and 'abc'. At the bottom of the white box, there is a footer bar with two pieces of information: '3 items left' on the left and 'All Active Completed' on the right.

What needs to be done?

- ✓ finish this presentation
- ✓ abc
- ✓ abc

3 items left All Active Completed

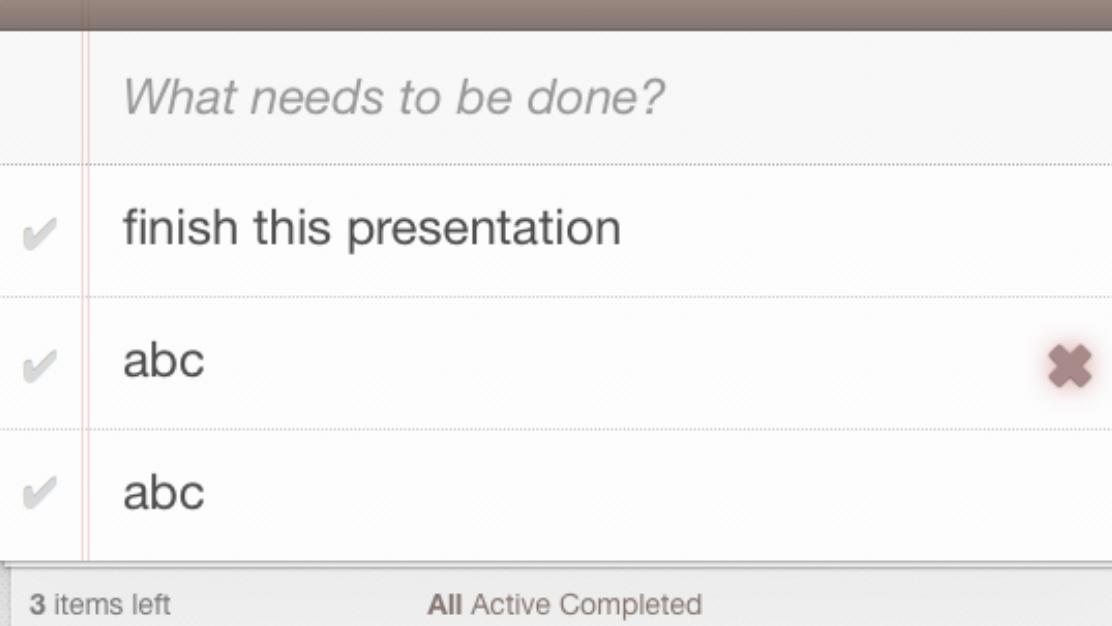

Example

todos

What needs to be done?

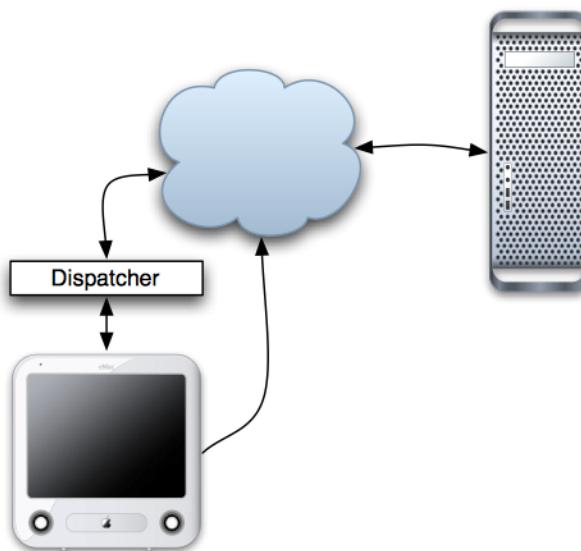

- ✓ finish this presentation
- ✓ abc ✗
- ✓ abc

3 items left All Active Completed
